Key Knowledge:

- Our local river is the River Marden.
- Rivers have sources, channels, tributaries and mouths.
- Rivers receive water from a wide areas and flows eventually into a lake or the sea. The water flows naturally downwards, sometimes underground and eventually to the sea.
- Mountains are a natural part of the landscape with steep slopes.
- They rise above 300m and have a summit of at least 600m.
- Some mountains are found in groups called a mountain range but some mountains can be on their own.
- Mount Everest is the highest mountain in the world - 8848m
- The tropics are regions of Earth that lie roughly in the middle of the globe either side of the equator. They are the Tropic of Cancer and the Tropic of Capricorn.
